19-25  5 JB = 7

Are the 7 B+W duplications of 46 through 52 a just similar to 45-52 - does this mean 45 pix, or 52 pix, or, of the JBs are different negatives 63 to 70? Why are some without initials, some with, some JB (Bro) JTBP (also Bro) were these 7 taken after everything? If so, were they all taken after initial ones?
